

Nano-Tex Debuts All Conditions Fleece

Textile World

February 16, 2010

Oakland, Calif.-based Nano-Tex -- a developer of nanotechnology-based textile enhancements for the apparel, home, and commercial interiors markets -- has introduced All Conditions Fleece, a fabric that offers inherent protection from the elements combined with the characteristics of traditional fleece, such as durability, comfort and easy care. The fabric also is static-resistant. Nano-Tex offers All Conditions Fleece in a variety of weights and styles including standard double-sided fleece, microgrid and sweater knit.
